

RF Pathways
Warehouse Management Systems

Technologies proven to improve customer service and increase productivity using mobility within your Supply Chain. Improve your offerings with traceability and accountability to drastically increase your bottom line.

RF Pathways is a global provider of Warehouse Management Software, 3PL solutions and Supply Chain Mobility applications. Our packages are easy to implement and modify which provides our customers time and cost saving innovations that increase their profit margins significantly.

Since 1991 we have specialized in the design and development of supply chain industry data collection networks, custom applications and WMS software. Our goal is to integrate all operational aspects of your business seamlessly.

Implementing RF Pathways WMS will allow you to focus on leveraging opportunities. Cost savings in the form of reduced inventory and shipping errors while increasing pick rates and customer service offers an ROI of 100% typically within the first year!

Easy to Implement, Integrate & Configure

Our WMS provides a standard software solution that is easily configured to work the way you work. All transactions take place in real-time using an industrial wireless LAN to deliver advanced mobility, security and absolute data accuracy.

RF Pathways WMS interfaces with a large number of accounting systems and end-to-end business solutions. We have developed an SDK called eLink to help the integration move smoothly between the systems.

Examples of interfaces include SAP ECC 6.0, SAP Business

One, Sage Software including ACCPAC, SAGE PRO, PFW (Platinum), Microsoft Software including Great Plains v 9.0 and 10, Navision 2009, Adagio, and multiple legacy systems.

RF Pathways WMS integrates with multiple RF hardware products, including LXE, Motorola/Symbol, Intermec and Pision Teklogix.

Whether your installation is for a standalone warehouse or a complex 3PL, we can help. Draw upon our collective expertise to implement and run the most effective, flexible and affordable WMS in the industry.

Accommodating Your Existing Parameters and Functions

RF Pathways WMS is easily configured based on a range of parameters that best suits your operation, including:

- Weight - standard, catch
- Order type classification
- Zoning
- Item classifications
- Lot number control
- Multiple UOM
- Random locations
- Dedicated locations
- Inspection
- Return capability
- Expiry date tracking
- License plate control
- Stock rotation rules
- Serial number capture
- 3PL billing

Functions are easy to implement at discrete single sites or multiple warehouses. Processes can be activated on a modular basis to ensure there is no disruption of day-to-day activities. Functions include:

- Cycle count
- Receiving
- Putaway
- Cross-docking
- Multi level inquiry
- Replenishment
- Zone picking
- Consolidated picking
- Lot specific picking
- Physical count
- Staging
- Loading
- Shipping
- EDI capable
- Reworking

Benefits

The benefits that our clients can expect from implementing RF Pathways begin immediately;

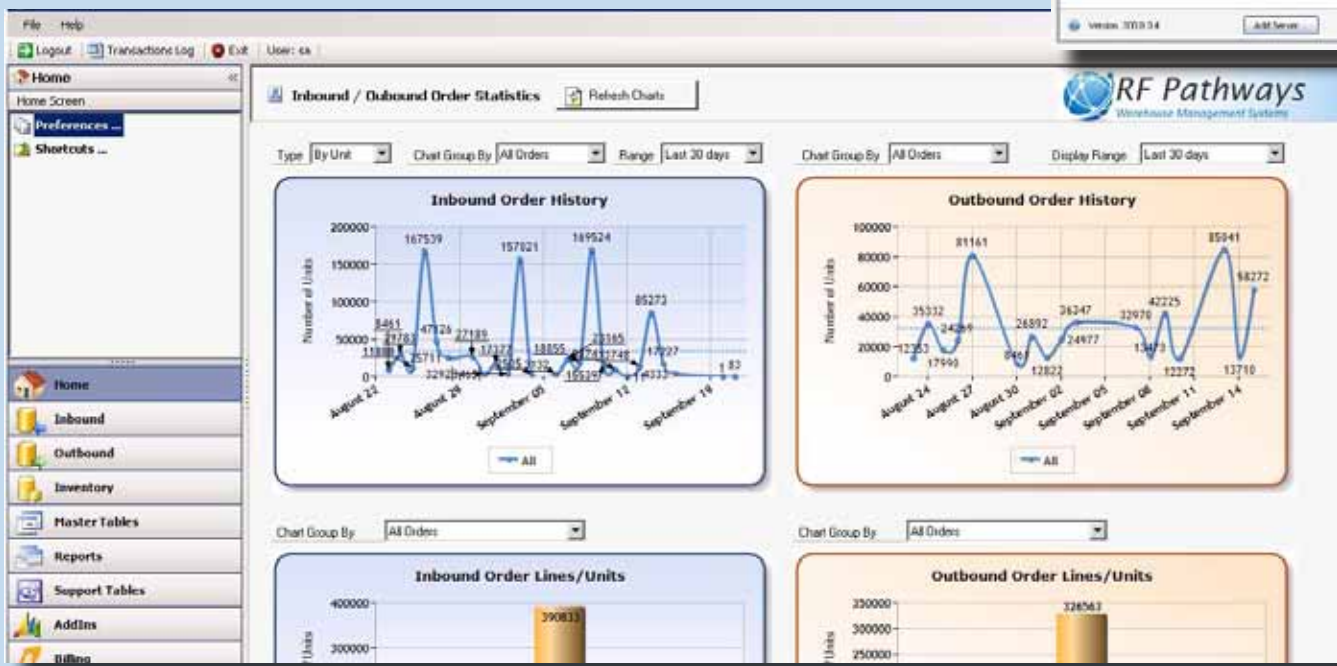

- Increased productivity
- More accuracy = lower inventories
- Lower inventories = faster turns
- Faster turns = better product rotation
- Reduced exposure to recalls
- Elimination of data errors
- Instantaneous data validation
- Enhanced customer service
- Faster order delivery
- Total traceability, accountability
- Fewer shipping errors
- Reduced labour costs
- Increased warehouse capacity
- Real time data capture for 3PL billable transactions

Business Requirements Analysis

Selecting RF Pathways WMS is the start of a relationship that will see your company achieve new levels of efficiency and profitability.

All RF Pathways projects begin with an in-depth analysis of your operation, discussions about your logistics functions and what you would like to achieve with your WMS. This analysis provides you with a full Business Requirements Specification and develops a workflow that matches your business requirements.

State-of-the-art Software Solutions

Our state-of-the-art solutions, competitive pricing and proven track record will deliver a system that performs accurate transactions in real time. Information is up to the minute, reports are as exhaustive as you want them to be and billing will shave days off your receivables. This alone has repaid the cost of many RF Pathways systems. As well, simple remodeling for optimal efficiency has allowed many of our clients to achieve best-in-class status in their industry.

Our Partners

Automation Associates partners with industry leading technology companies to deliver robust, affordable, and flexible WMS solutions for the broadest range of industries and customers. In order to reach and support customers across North America effectively, we partner with industry leading consultants, systems integrators, and hardware resellers who've forged strong relationships with customers in their local geographies.
