

Total visibility of your warehouse or distribution centre, a perfect interface between your hardware, software, departments and processes

Introducing RF Pathways Warehouse Management Software (WMS).*

RF Pathways is a global provider of WMS and 3PL solutions. Our powerful supply-chain execution solutions are easy to customize and implement and provide our customers with innovation, cost savings and increased profitability.

As specialists in the design, development, implementation and support of the industry's best automated data collection system (ADC), RF Pathways WMS seamlessly integrates all the operational aspects of your business. We have specialized in wireless technology since our inception in 1991 and are proud to have a portfolio of more than 400 installed systems in a wide variety of vertical markets ranging from Fortune 500 to SMB organizations.

Implementing RF Pathways WMS allows our clients to focus their time on leveraging opportunities, not solving problems. Drastic reduction in shipping errors, doubling of pick rates and improved customer service allows our clients to benefit from cost savings that directly impact their bottom line.

100% ROI is typically achieved in the first year!

Easy to Implement, Integrate & Configure

Our WMS provides a standard software solution that is easily configured to work the way you work. Operating on an RF platform, all transactions take place in real-time and offer a more efficient way of doing things. You get immediate, un-tethered access to the resources of an advanced WMS. Using an industrial wireless LAN, it delivers advanced mobility, security and absolute data accuracy.

At RF Pathways, we blend technologies and hardware.

Systems - Our standard configuration package interfaces with virtually all accounting systems and end-to-end business solutions. Examples of interfaces include SAP ECC 6.0, SAP Business One, Sage Software including ACCPAC, SAGE PRO, MAS 90, 200, 500, PFW (Platinum), Microsoft Software including Great Plains v 9.0 and 10, Adagio, Exact-Macola and multiple legacy systems using eLink, our standard API.

RF Hardware - RF Pathways WMS integrates with multiple RF hardware products, including LXE, Motorola/Symbol, Intermec and Psion-Teklogix.

Warehouse Equipment - Our solution is compatible with warehouse equipment such as storage carousels, pick-to-light, automated guided vehicles and more. We take over where others leave off, removing the guesswork from implementation.

Whether your installation is for a standalone warehouse or a complex 3PL DC, we can help. Draw upon our collective expertise to implement and run the most effective, flexible and affordable WMS in the industry.

Supply Chain Mobility Solutions*

Increased profitability & productivity

More accuracy = lower inventories

Lower inventories = faster turns

Elimination of data errors

Improved customer service

Total traceability, accountability

Reduced labour costs

RF Pathways

Benefits

The benefits that that our clients can expect from implementing RF Pathways WMS begin immediately;

- Increased profitability & productivity
- More accuracy = lower inventories
- Lower inventories = faster turns
- Faster turns = better product rotation
- Reduced exposure to recalls
- Elimination of data errors
- Instantaneous data validation
- Improved customer service
- Faster order delivery
- Total traceability, accountability
- Fewer shipping errors
- Reduced labour costs
- Ability to serve new customers
- Real time data capture for 3PL billable transactions

Accommodating Your Existing Parameters and Functions

RF Pathways WMS is easily configured based on a range of parameters that best suits your operation, including:

- Weight - standard, catch
- Order type classification
- Zoning
- Item classifications
- Lot number control
- Multiple UOM
- Random locations
- Dedicated locations
- Inspection
- Return capability
- Expiry date tracking
- License plate control
- Stock rotation rules
- Serial number capture
- 3PL billing

Functions are easy to implement at discrete locations or multiple warehouses. Implementation on a modular basis ensures there is no disruption of day-to-day activities. Functions include:

- Pre-receiving
- Receiving
- Putaway
- Cross-docking
- Replenishment
- Zone/Batch/Wave picking
- Consolidated picking
- Lot-specific picking
- Staging
- Loading
- Shipping
- EDI capable

Business Requirements Analysis

Selecting RF Pathways WMS is the start of a relationship that will see your company achieve new levels of efficiency and profitability...guaranteed! All RF Pathways projects begin with an in-depth analysis of your operation, discussions about your logistics functions and what you would like to achieve with your WMS. This analysis provides you with a full Business Requirements Specification and develops a workflow that matches your business requirements.

State-of-the-art = Best-in-class

In brief, our state-of-the-art solutions, competitive pricing and proven track record will deliver a system that performs fast, accurate transactions in real time. Information is up to the minute, reports are as exhaustive as you want them to be and billing will shave days off your receivables. This alone has repaid the cost of many RF Pathways systems. As well, simple remodeling for optimal efficiency has allowed many of our clients to achieve best-in-class status in their industry.

Contact us today and let us show you how to turn one of your biggest cost centres into an opportunity for profit, innovation and growth...and make your own job easier in the process.
